### REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the prior art does not teach or suggest a method of variably restricting a body lumen in a patient, comprising: guiding an elongate implantable device into body tissue of a patient to a location adjacent a body lumen to be restricted using an elongate probe member, the elongate implantable device having an expandable element located at its forward end and having a port portion provided at its rearward end, so that the expandable element is positioned adjacent to the body lumen; and providing a flowable material at the rearward end from a source directly to the port portion, so as to expand the expandable element to at least partially restrict the body lumen. As pointed out in the Board of Patent Appeals and Interferences Decision of March 3, 2003 (page 7 lines 7-9; page 9 lines 7-11), the prior art specifically does not teach or suggest providing the flowable material at a location separate from the expandable element or providing the flowable material from a source directly to the port.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
